Grow Domes

CLEAR PVC DOMES

*Great for both
backyard
gardening &
large
commercial
growing
opportunities.*

Domes are ideal for growing all types of plants and vegetables. Many fruits, vegetables, and herbs will thrive in a dome.

Clear PVC is not UV resistant which allows the sun's rays to enhance growing in the domes.

Sizing

Clear domes sizes range from 10 to 164 feet in diameter and 84 feet in height.

Conditions

Interior of the greenhouse domes becomes significantly warmer than the external ambient temperature when exposed to sunlight and protecting the contents inside the dome in cold weather.

Additional Uses

Many cannabis growers use our domes for their crops. Demand for cannabis products has dramatically increased in the last couple of years in the USA making dome growing a cost effective alternative in the growing process.
