

■ GEODESIC DOMESPACES

- *Geodesic domes are a green and sustainable alternative to conventional structures that can be used for a variety of things, including homes, observatories, agricultural greenhouses, and even shops. You may turn your 3D model into a real, 3D-printed building using our geodesic dome printing service. Any 3D pattern or even text may be put on the cover and is available in 6 color combinations.*

■ LIVING CONDITIONS

Geodesic printed domes are distinctive domes that come with a printed cover with a personalized design. The printing is strong and environmentally friendly, and it can survive all types of weather, including wind, rain, and snow.

- Tempered glass windows or screen vents for ventilation
- Thermo insulated liner and a curtain and rod set are optional insulation options.
- Optional wood stove for heating
- Cooling: An optional little HVAC system is available locally.
- Toilet: *Toilet not included in the price of the dome; optional integrated modular toilet with shower.
- Includes solar or generator-powered power and water supply. It is possible to connect to an existing water and power supply.
