

GDH HEXA SERIES

Luxury domes from the GDH Hexa series have exquisite hexagonal glass panels that are available in a variety of hues, making the domes nothing short of architectural marvels.

GDH Hexa domes are durable and suitable for a range of applications, including camping, residential, commercial, educational, scientific, recreational, corporate, and military ones. Since they can be equipped with Nano insulated film for heat and cold prevention from the outside and to lessen glare from the sun, GDH Hexa domes are designed to withstand all types of weather conditions. As an alternative, double pane insulated tempered glass is also offered for the dome.

The GDH Hexa series domes are ideal for an unrivaled, unparalleled level of luxury when glamping.

Customizable

Made with an aluminum alloy frame, available in colors such as, grey, white, black, gold, and brown.
